- Artist's Photo should be loaded into the picture box with the help of Load Image button to browse the photo.
 - The other fields for Name, DOB and Sex in the form should be included to get author's information.
 - The combo box for Style should be loaded with different Art style: (*Digital Art, Abstract Expressionism, Art Deco, Baroque, Classicism, Conceptual Art, Expressionism*).
 - ✓ The button *Back To Main* should show or display back the dashboard while hiding the form Add Artist itself.
 - The button *Add Artist* should add or store the artist's information by displaying the message 'Artist is added!' on a message box.
 - ✓ You should have a class Artist with appropriate private variables, constructor and properties, to store the artist information as an array of Artist.
- (d) The button *Add Art* in the dashboard will display the Add Art form shown below with following functionalities:

The screenshot shows a Windows-style application window titled 'Add Art'. Inside, the form is titled 'Add Art Details'. It features several input fields: 'Name' with the value 'Michael', 'Artist' with a dropdown menu showing 'Tony Haggerty', 'Year' with the value '2019', and 'Size (Inches)' which includes 'Height' (21.5) and 'Width' (15.5) sub-fields. A 'Price' field contains '7000.00'. To the right of these fields is a large empty box labeled 'Photo of the Art' with a 'Load Image' button below it. At the bottom of the form are two buttons: 'Back To Main' and 'Add Art'.

- 3 • Photo of the Art should be loaded into the picture box with the help of *Load Image* button to browse the sample photo.
